<b>Cley Marshes</b>	*	*	*	*	*	*	*

**Learning objective: Students will have experienced or be able to recognise management strategies found at Cley Marshes.**

Description: Cley Marshes is an Internationally important wetland habitat for bird life, managed by the Norfolk Wildlife Trust. The course sets out to review the management strategies in place and problems associated with conserving such a fragile ecosystem.

AIMS	FIELDWORK	ICT
<ul style="list-style-type: none"> <li>To understand exactly what Cley Marshes are and their importance.</li> <li>To understand the physical processes operating at Cley Marshes, and understand how and why they are being managed.</li> <li>To understand the human activities present at Cley Marshes, the conflicts caused by these and the associated management strategy.</li> <li>To understand and investigate any problems created by the management.</li> <li><b>Keywords:</b> Succession, Ecosystem Management, Flood defence, Conflicts.</li> </ul>	<ul style="list-style-type: none"> <li>To identify management strategies.</li> <li>Identify succession.</li> </ul>	<ul style="list-style-type: none"> <li>Collate information using word processing software.</li> <li>Insert photos and diagrams</li> </ul>
